Model Checking Research Report : IBM GigaHertz Processor

Nicolas Desfeux

Newcastle Upon Tyne, November 30, 2011

Contents

| | | |
|----------|---|----------|
| 1 | Introduction | 1 |
| 2 | IBM Gigahertz Processor | 1 |
| 2.1 | IBM | 1 |
| 2.2 | Processor | 1 |
| 3 | Verification on IBM gigahertz processor | 2 |
| 3.1 | Problem specifications - Method use | 2 |
| 3.1.1 | Properties that needs to be verify | 2 |
| 3.1.2 | Interest of using model checking | 2 |
| 3.2 | Model checking of IBM gigahertz processor | 2 |
| 3.2.1 | Model checking in IBM | 2 |
| 3.2.2 | Using on the Gigahertz processor | 2 |
| 4 | Conclusion | 2 |

1 Introduction

Nowadays, the need for confidence is higher than ever. That's why people need to provide proof of the exactitude of the product or service they want to provide.

2 IBM Gigahertz Processor

2.1 IBM

International Business Machines, also known as IBM [1][2], is a major society in computers. They develop hardware and software solutions for professional and single users. They also provide services in a lot of subjects related to

computers (like services in security and confidentiality).

2.2 Processor

3 Verification on IBM gigahertz processor

3.1 Problem specifications - Method use

3.1.1 Properties that needs to be verify

3.1.2 Interest of using model checking

3.2 Model checking of IBM gigahertz processor

3.2.1 Model checking in IBM

3.2.2 Using on the Gigahertz processor

4 Conclusion

We worked hard, and achieved very little.
